

Thank you for allowing me to comment.

In brief:

- I feel 1500 watts is an acceptable limit
- I feel that the 5Mhz band should be open to all Amateurs General class and above
- I feel having a small slice of spectrum dedicated to CW/Digital is an appropriate way to allocate resources. 5250Khz to 5300Khz would be an acceptable 50Khz slice of spectrum.

Thank you for your time.

Very Truly Yours,  
Scott Pederson
